

ONESOURCE Global Trade Content

The ONESOURCE® Global Trade Content solution provides a central repository for importers and exporters to utilize up-to-date regulatory information from around the globe.

The challenge

Did you know that Brazil has been known to update its tariff schedule over 250 times within a 12-month period? Or that, in the European Union, even though every member state uses the TARIC as its base, each country then applies different taxes and controls to create its own Harmonized Schedule (HS)? Not to mention each country has specific documents that are needed for importing and exporting. Managing just one country's global regulatory trade data is a full-time job. Imagine the amount of time needed to manage that same data for every country in which your organization does business.

The solution

Using an automated system to organize and maintain customs data from around the globe is important. Keeping that data updated and providing it to all users regardless of location or language is imperative. The ONESOURCE Global Trade Content solution does both of these, plus more.

With ONESOURCE Global Trade Content, you are accessing the most up-to-date regulatory information available. Facilitating trade by providing importers and exporters with current

regulatory trade data in a central repository accessible via the web, web services, or extract is the foundation of ONESOURCE Global Trade Content.

The benefits

ONESOURCE Global Trade Content provides companies with 24/7 access to trade regulations around the world.

ONESOURCE Global Trade Content is built using Software-as-a-Service (SaaS) technology, which gives companies access to data from 210+ countries and territories.

Feature	Activity
Central database for tariff schedules	Reference 210+ tariff schedules in English and the native language in a central database
Additional tariff schedule information	Review all additional information related to a tariff schedule such as Antidumping Duties, Binding Rulings, Additional Codes, WCO Explanatory Notes, Documents, and more
Trade Agreement Rules of Origin	Access 450+ Trade Agreement Rules of Origin integrated with the appropriate duty rates for that tariff schedule
Import/export controls	Utilize import and export controls (OGA/PGA) in order to know all other elements outside of duty rates that may affect the movement of a product
Export Classifications and License Determination	Access Export Classifications (ECN/ML) and License Determination for 60+ Export Control Lists
Restricted party and product data	Leverage lists of embargoed/sanctioned countries, restricted parties, and restricted products in order to screen every shipment before export
Connectivity	Use Global Trade Content as part of a SaaS solution or integrate it within your solution by utilizing extracts or web services

Analyzer Suite

Building on the core functionality of ONESOURCE Global Trade Content, our Analyzer Suite of solutions allows you to perform analysis on company-specific data regarding importing and exporting within your potential trade lanes. The Analyzer Suite encompasses three ONESOURCE products, which can be implemented separately – Trade Lane Analyzer, Duty and Tax Analyzer, and Tariff Analyzer. You can use these tools to research duty rates, estimate duty and tax cost, visualize “what if” scenarios for multiple trade lanes, and plan new import and export strategies. The foundation of these analytic tools is the ONESOURCE Global Trade Content database.

Thrive globally. Compete confidently with ONESOURCE Global Trade Solutions.
